ABOUT ME

Computer Science Engineer skilled in front-end and back-end development, with real project and internship experience in React, Node.js, and database operations. I deliver clean UI design, optimized code, and scalable solutions that help organizations improve product quality and user experience.

INTERSHIPS

Software Developer Intern | Manvian Groups | Sep - Dec 2025

- Worked on multiple web-based projects, focusing on front-end development.
- Contributed to client-specific projects by developing responsive UI components.
- Developed a complete full-stack web application, combining front-end interfaces with backend services and database operations.

Java Full Stack Development Intern | GB TECH Corp | Mar - Apr 2025

- Front-end development using HTML, CSS, JavaScript, React.
- Back-end development using NodeJS and Java.
- Collaborating with the development team using agile methodologies
- Database management using MongoDB.

EDUCATION

B.E.Computer Science and Engineering

2021-2025

Kings Engineering College, Chennai
CGPA of 8.0

12th

2020-2021

Daniel Thomas Matric Hr Sec School, Chennai
with 80%

SKILLS

Technical Skill

- Languages:** Java, Python, SQL
- Web Development:** HTML, CSS, Frameworks, JS, React
- Database:** MongoDB, MySQL, PostgreSQL

Soft Skill

- Decision Making
- Time Management
- Adaptability

PROJECTS

1. Food Ordering Web App

A Swiggy-like web app built with HTML, CSS, JavaScript, and Firebase to browse food items, place dummy orders, and track them via a user dashboard.

2. Student Database Management System

A web app allowing students to log in using roll number and DOB to view timetables, announcements, and personal details.

3. Book review and personalized recommendation system

A full-stack app using React.js and Firebase with content-based recommendations based on user reviews and genre tags.

CERTIFICATES
